Level 4 out of 6 (2 out of 3 years)

Maximiliano Raúl Malvicino

Software Development. Sound Engineering.

I am passionate about acoustics and programming. Throughout my career, I have been working on projects that combine these fields and converge in signals processing. Until now, my work experience has been mostly focused on teaching. Motivated by the new challenges that the growth of the technology industry implies, I am currently looking for my first experience in the IT field as a software developer.

Portfolio: <https://mrmalvicino.github.io/>
